Re: St. George Schoolyard/landfill Excavation

Dear Mr. Wilson,

This department has received and reviewed the Hart Crowser document (A-8406-00) dated November 8, 1995 detailing the excavation and subsequent, removal of approximately 1000 buried drums. This department concurs with the recommendations on page 3 of the document which outline proper disposal for contaminated soils and water.

This letter will serve to acknowledge that the area commonly referred to as the schoolyard/landfill or drum cache has been remediated to the satisfaction of the department. As you know this work has proceeded as part of a Department of Commerce (NOAA) cleanup agreement negotiated by this department to represent concerns by local entities. This letter is issued pursuant to terms of the "two party agreement" between the State of Alaska (ADEC) and the Department of Commerce (NOAA) and is intended as a No Further Action determination for only the site referred to as the schoolyard/landfill (drum cache).

Sincerely,

Kay Dornenburg
Site Project Manager
